Todd,

After researching the issue I have come to the conclusion that as long as you take the rocks from the surface you do not need any permits and as long as you do not sell the rocks in Tooele County you do not need a business license. You must, however, submit for a business license in every jurisdiction in which you do sell the rock. Furthermore, if the time comes that you do desire to take rocks from the subsurface, then you must submit for the necessary permits.

DIV. OF OIL, GAS &amp; MINING

We are looking at purchasing some land in Tooele county and we want to know if we need a business license or permit to haul rock out of Tooele county. The rock is on the ground and we will not have to dig or mine in order to load the rock.
